

# INSTALLATION GUIDE

## LogTrade

2018-12-06

# **1** GENERAL

To enable high speed automated printing of package labels, waybills and other documents LogTrade Technology has developed a printing software called *LogTrade Integrated Printing*, running as a Windows service. This software is installed on any computer (server or work station) that has access to the printers that should be used.

A printing station is a normally a combination of a label printer and a laser A4 printer but can be limited to only one of them is applicable in your setup. Each printing station is called a *print queue* in LogTrade.

One print queue shall only be setup in one installation of *Integrated Printing*, that means that even if you have 10 different work stations that uses the same printers the software should only be installed once. If you have for example 3 different print queues you can decide to install the software on one central server and handle all three queues or install on up to 3 different computers that handles one queue each.

The activation and installation process can be done before or after the setup is done in Dynamics 365 Business Central. If you have more than one print queue it is recommended to do the activation and setup in LogTrade first since Dynamics 365 Business Central then takes advantage of the queues that are already setup then.

# **2** ACTIVATION

To open the LogTrade webportal you login from the address <u>www.logtrade.se</u>.

Go to *Settings / System settings / Integrated Printing*. On the tab Settings you fill in the checkbox *Activate Integrated Printing*. By default a print queue called *Standard* is already created. If you want more than one print queue it is recommended to delete this queue and create new queues with more descriptive names.

The following pictures shows the installation of LogTrade Printer executed from a web browser. The security related screenshots in the beginning might be different in various browsers. These screenshots are shown since the installation program is not signed and that is why Internet Explorer consider this as a potential security issue. It is not a security issue.

Kogtrade.Printing.Install.x64.en-us.msi is not commonly downloaded and could harm your computer.	Delete	Run	View downloads	$\times$

Choose *Run* to continue installation and the following dialog is shown.

# **4** PARAMETER SETUP FOR INTEGRATED PRINTING

Open Integrated Printer Configuration from Windows Start Menu. Make sure you are opening "Integrated Printer Configuration" and NOT "LogTrade Printer".

tearsted Printing	duranted anticas D		About				
	avanced settings   Pr	oxy settings	ADOUT				
Connections	Printing	Win	dows service	status: Stopj	ped	Start	
License number	Print queue					Edit	
						Add	
						Delete	

LogTrade Printing Configuration is used to setup which printers that should be used for each *print queue*. Make sure to check *Enable Integrated Printing* and then click *Start* to start the Windows service.

Program name: Publisher: File origin:	Logtrade.Printer.exe <b>Unknown</b> Hard drive on this comp	puter		
		Yes	No	
○ Show details		L		

Click Yes to continue configuration.

Fill in your login credentials you have gotten from LogTrade and then click *Connect*. That will bring up possible *Print Queues* to select.

After you have chosen Print Queue you must select which printers to use for each document.

- STD Printer for waybills, CMR, invoices, delivery notes.
- STE Printer for package labels, normally a label printer.
- STL Printer for Manifest Lists. Often same printer as for STD.
- STV Not used for automated printing.
