

USER GUIDE LOGTRADE CONNECT ADVANCED SETUP

LogTrade Connect for Microsoft Dynamics 365 Business Central

V 1.0.0.0

1 GENERAL

This document describes how to do advanced delivery setup in LogTrade Connect for Microsoft Dynamics 365 Business Central It is recommended to start with the *Assisted Setup*. After the assisted setup is completed the system is ready for creating transport documents or you can do more advanced setup. During the *Assisted Setup* process necessary codes and values are downloaded from LogTrade. For example, carrier product codes, package types and more. A carrier product is a service the carrier has, for example part load, full load, agent delivery, home delivery, business package service etc.

In *Delivery Setup* it is possible to tweak and optimize your setup depending on your companies' specific demands and needs.

2 GENERAL DELIVERY SETUP

Open *Delivery Setup* by searching with the search functionality. The start page shows general delivery setup such as LogTrade license number and several default values.

3 BASE DATA DELIVERY SETUP

Open the menu *Navigate* in *Delivery Setup* to see where the settings can be changed and optimized. In *Navigate* there is one group called LogTrade, all options in that group are regarding base data from LogTrade.

3.1 CARRIERS

This list shows all carriers available in your LogTrade license. If you add any carrier new carriers to you license or if any existing carrier change their products you need to update Microsoft Dynamics 365 Business Central. This is done from the menu *Actions / Get Carriers*.

3.2 PRINT QUEUES

Integrated Printing is a feature that offers more automated and flexible printing. With Integrated Printing, you can print labels from any printer connected to the Internet. This means you can print out a document on a printer in New York while you are in Stockholm. A default print queue will always be added to your LogTrade license. If you have 2 or more it is recommended to create new queues with more descriptive names. If you add or change the print queues in LogTrade web portal you have to synchronize this with Microsoft Dynamics 365 Business Central. This is done from the menu *Actions / Get Print Queues*.

HEADLINE	CODE		DESCRIPTION		orts		
Wa	Standard	100 E	Standard		UITS		

3.3 SHIPMENT TEMPLATES

If you want to use carrier additional services, for example heat, cold, advice, time definite delivery, time definite pickup, cash on delivery etc. you can setup a shipment template in LogTrade. When using this template instead of direct carrier codes all additional service will be applied. If you add any shipment templates on your license you must download these to Microsoft Dynamics 365 Business Central. This is done from the menu *Actions / Get Shipment Templates*. Remember that you will also need to download them if you change description on any existing templates. This is done from the menu *Actions / Get Shipment Templates*.

3.4 SENDER TEMPLATES

Normally all sender information is taken from the location or company information in LogTrade. But it is also possible to work with sender templates. In that case you set up these in LogTrade web portal and customer number and other information will be taken from LogTrade instead of from Microsoft Dynamics 365 Business Central. This can be good if you for some reason want to make shipments in the web platform too.

3.5 LOGTRADE USERS

It is possible to use different LogTrade users and print queues for different logins in Microsoft Dynamics 365 Business Central. This setup is done in *LogTrade User*. If not user is setup the generic user from *Delivery Setup* will be used.

4 BUSINESS CENTRAL SETUP AND LINKING

In *Delivery Setup* you will also find links to several pages where you do different linking between Microsoft Dynamics 365 Business Central entities and LogTrade codes. Read more about each step below.

4.1 SHIPPING AGENTS

In the shipping agent list, you define which LogTrade carrier code that should be linked to each shipping agent in Microsoft Dynamics 365 Business Central. Normally this is a one-to-one relation, but it is possible to have the same carrier linked to several shipping agents in Microsoft Dynamics 365 Business Central. To add or change a relation, just click *Edit List* and choose the *Carrier Name* from the dropdown list. You must also fill in your *Payer Customer No.* which is you customer number for that specific carrier. The *Internet Address* is used to track the shipments based on the package tracking number on the posted sales shipment, that is when clicking Actions / Functions / *Track Package*. LogTrade general tracking site will be used if this field is empty.

For each shipping agent there are shipping agent services that specifies their products (services). In the field *Product Name*, you choose a product from the filtered list. The list is filtered on the carrier from previous screen, shipping agent. Here you can also choose a *Default Package Type Code* and *Payer Customer No.* specific for this shipping agent service. Alternatively, you can select a *Shipment Template Code* if you have prepared any in LogTrade web platform.

4.2 CUSTOMER NUMBERS

It is possible to set up carrier customer number for your customers to make it easier when the carrier should invoice your customer direct. It is possible to specify a customer number for a specific shipping agent and even a specific shipping agent service and also for a customer or a certain delivery address code for that customer. Even destination country can be used to get a really detailed setup.

Activities		×	Customer								

4.3 PACKAGE TYPES

Each carrier product there are a specify set of package types available. For some carriers it can be hundreds of allowable package type codes. To make it easier for the end user LogTrade Connect defines general package types with relations to carrier product specific codes. Out of the box a predefined setup is used but it is possible to change for each company.

4.4 SHIPMENT METHODS

For international deliveries it is normally mandatory to use Terms of Delivery codes. Depending on the carriers you use the terms of delivery codes can be different. Unfortunately, the different carriers might have different Terms of Delivery codes in their integration specifications. That's why it is important to link shipment methods in Microsoft Dynamics 365 Business Central to terms of deliveries in LogTrade.

ρs	Search + New	🕏 Edit Lis	t X Delete Process Show Attack	hed 🛛 📲 Open in Exce	I Actions …	\ ≣
	CODE		DESCRIPTION	FREIGHT PAYER	TERMS OF DELIVERY LOCATION	NO. OF TERMS OF DELIVERY RELATIONS
	CFR		Cost and Freight	Sender		1
	CIF	×	Cost Insurance and Freight	Sender		1
	CIP		Carriage and Insurance Paid	Sender		1
	СРТ		Carriage Paid to	Sender		1
	DAF		Delivered at Frontier	Sender		5
	DDP		Delivered Duty Paid	Sender		1
	DDU		Delivered Duty Unpaid	Sender		1
	DELIVERY		DELIVERY	Sender		_
	DEQ		Delivered ex Quay	Sender		1
	DES		Delivered ex Ship	Sender		1
	EXW		Ex Warehouse	Recipient		3
	FAS		Free Alongside Ship	Recipient		1
	FCA		Free Carrier	Recipient		1
	FOB		Free on Board	Recipient		1
	PICKUP		Pickup at Location	Recipient		_

It is necessary to define who is the freight payer for each shipment method since that is used in the communication to the carrier, so they invoice the right company.

When running the *Assisted* Setup suggestions are made for linking Microsoft Dynamics 365 Business Central shipment methods to LogTrade Terms of Delivery Codes. It is possible to change, add and delete terms of deliveries by clicking on *Navigate / Terms of Delivery Relations* in the menu above the lines or by clicking on the number in the column *No. of Terms of Delivery Relations*.
